Skills

- HTML | CSS | Javascript | Typescript | React | Next.js | Tailwind | Express.js | Node.js | Prisma | Mysql | MongoDB | SQL | NoSQL
- Bootstrap | Web Design | Frontend | Backend | REST API | Material UI | OOP | PWA | Stripe | Payment Gateway

Experiences

- **Software Engineer**
  ProudIT (PT. Sapta Pilar Nusantara) · (Sep 2023 - present)
  Improve the company branding by developing a company profile website using Reactjs, and also contributing to some of the client projects as a Frontend developer. e.g Astra Honda Motor Indonesia, etc

Projects

- **E-commerce Admin Dashboard**
  Fullstack E-Commerce + Dashboard & CMS using NextJS. The e-commerce admin dashboard is a user interface specifically designed to manage and control the operations of an online store or e-commerce platform, Users can create their own store and start selling products that they can customize and monitor the daily report of the sales. Also includes a payment gateway using Stripe, so the customers can pay the transaction just in online.
  Tech Stack: NextJs, React, Typescript, Tailwind, Mysql, Prisma, Stripe, ShadcnUI

- **E-commerce Store**
  An E-commerce store is an online platform or website where businesses and individuals can buy and sell products or services over the Internet. Within the store, the products that are added in the E-commerce Admin will be displayed and sold, Businesses can use this application as a store of their E-commerce and they don't worry about the payment of the store because it uses Stripe, So the customers can pay the transaction using his credit card.
  Tech Stack: NextJs, Typescript, React, Tailwind, Stripe

- **REST API with JWT Authentication**
  I developed a robust RESTful API with JWT (JSON Web Token) authentication, ensuring secure and efficient communication between clients and the server. This application facilitates seamless data exchange and user access control, it also includes pagination for better performance when GET data from the server, this project is showcasing my expertise in web development and security best practices.
  Tech Stack: ExpressJs, NodeJs, Mysql, Prisma, JWT

Certification & Awards

- **1st Runner up Web Technology Competition by KEMENDIKBUD**
  Lomba Kompetensi Siswa SMK
  Tingkat Jakarta Timur 1
  (Aug - 2023)

- **Back End Development and APIs**
  freecodecamp
  (Jul - 2023)

- **Front End Development Libraries**
  freecodecamp
  (Sep - 2022)

- **Belajar Membuat Front-End Web untuk Pemula**
  Dicoding Indonesia
  (Oct - 2023)

- **Belajar Dasar Pemrograman JavaScript**
  Dicoding Indonesia
  (Oct - 2023)

- **Belajar Dasar Pemrograman Web**
  Dicoding Indonesia
  (Oct - 2023)

Educations

- **SMK Ristek Kikin**
  Computer & Network
  (2022 - present)
